

## **Computer Workstation / Back Office Software Installation on a non- ADI Computer**

### **Non- ADI computer's Installation of software: {Based on hours purchased}**

ADI will install software on computers not purchased from ADI with the following conditions.

- 1) Time - ADI will spend the allotted time pre-purchased, if it is going to take longer an additional fee may apply.
- 2) Due to the many variables with existing computers, in rare cases it may be determined that your computer may not be compatible with the software and may not be able to be installed.
- 3) ADI will not be held *liable* for any loss of data or system failure as a result of installation of software.
- 4) Report printers can be setup but additional fees / time may be required.

### **Work Station and Back Office Computer requirements:**

- 1) The Computer must meet ADI's specifications for hardware and software requirements. (see specification sheet for details)
- 2) The computer should be clean and free of additional software.
- 3) The computer must be dedicated to run the application software only, no internet browsing.
- 4) Any modifications to the computer must be done or approved by an ADI Technician.

### **Spyware and Virus:**

It is the customer responsibility to maintain and update virus and spyware software. ADI will not be held liable or responsible for any issues, problems, loss of data due to viruses / spyware.

If you are going to use the work station or back office PC for internet browsing, or install any additional software, and you wish to waive the above ADI standards for the computer please sign and date on the lines below. By signing this form you understand that your computer may not be covered in the event of any issues due to noncompliance with standards.
