

# Windows Embedded POSReady 7

The next generation embedded system for POS devices

Microsoft Windows Embedded POSReady 7 (POS = Point of Service) is a version of Windows 7 that has been optimized for retail point-of-service (POS) devices.

POSReady 7 is based on Windows 7 Point of Service delivers improved customer service through the use of flexible devices such as self-checkout stations, self-service kiosks, information kiosks, food ordering kiosks, and more.

POS systems are powerful when they are Windows Connected. With POSReady 7, devices can be easily integrated into an existing desktop management infrastructure, thus simplifying deployment and management. And Remote Desktop Protocol (RDP) 7.1 provides a seamless experience on remote POS devices.

Finally, POSReady 7 delivers BranchCache™, which gives staff working on POS devices in branch stores a similar experience to their local area network.

*Windows Embedded products are covered by an industry leading 10-year support program*

***Plus a product availability of 15 years.***

**Windows Embedded POSReady 2009 extended support ends on April, 9th 2019**

Products Released	Lifecycle Start Date	Mainstream Support End Date	Extended Support End Date	
Windows Embedded POSReady 2009	3/10/2009	4/8/2014	<b>4/9/2019</b>	(POSReady 2009 based on XP Professional).
